Objective

Frontend-focused Computer Science student with creative thinking for web development , software engineering , cloud computing. With experience in cloud computing , web development projects application. .Looking to bring fresh ideas to a forward thinking team.

Education

Medi-Caps University

Bachelors of Technology in Computer Science
Indore, India

Aug 2023 - May 2027

Experience

Frontend Engineer Intern — Worsingo, Bangalore

June 2025 – Sept 2025

- Deployed a responsive website to host a static website.
- Utilised **HTML , CSS , JavaScript , Cloud Functions , Serverless APIs , Cloud Databases**.
- Worked with **component-based architecture**, props handling, and lifecycle methods to build reusable and maintainable UI modules.
- Collaborated with backend teams to design and test **secure API endpoints**, optimised data handling, and troubleshoot integration issues.

Projects

Election Sentiment AI

Tech Stack: Python, FastAPI, Scikit-Learn, NLTK, HTML/CSS/JS

- **Built an end-to-end NLP pipeline** using Python and Scikit-Learn to preprocess text and classify real-time political sentiment.
- **Architected a FastAPI REST API** to handle asynchronous inference requests and ensure low-latency model serving.
- **Developed a responsive frontend dashboard** using JavaScript to visualize prediction metrics and sentiment trends.
- **Optimized model accuracy** by executing rigorous evaluation workflows, including K-fold cross-validation.

Learning Management System (LMS)

Tech Stack: Python, FastAPI, MongoDB, React, Tailwind CSS

- **Built a full-stack LMS** featuring robust role-based authentication (Admin/Instructor/Student) and dynamic enrollment workflows.
- **Architected an asynchronous FastAPI backend** with MongoDB to manage scalable RESTful routes for courses, assignments, and real-time progress data.
- **Designed a responsive React UI** that optimizes the user experience for tracking course analytics, grades, and content completion.

Nova AI Assistant

Tech Stack: Python, Next.js, React, Tailwind CSS, Framer Motion, MongoDB

- **Developed a modern AI assistant interface** leveraging Next.js and Tailwind CSS with a fully responsive, seamless dark-mode design.
- **Implemented fluid UI animations** using Framer Motion to create premium, interactive user touchpoints and high-fidelity transitions.
- **Integrated a secure MongoDB backend** to handle real-time user session logging and seamless dynamic cloud data connectivity.

Certifications & Achievements

Completed Microsoft Student Chapter Training (MSIT): Mastered responsive UI development using Tailwind CSS to build high-fidelity, designer-grade web applications.

Certified in Python Programming (ZeroExpert): Completed advanced core programming coursework through the Google Developers Group (GDG) on Campus – VIT AP.

Google Cloud & Gemini Certified (Simplilearn): Earned specialized skill badges for implementing Gemini for Google Workspace and leveraging cloud productivity tools.

Cloud Computing Project Certification (Simplilearn): Demonstrated practical deployment skills by successfully completing industry-standard cloud infrastructure projects.

Generative AI Foundation Certificate (Simplilearn): Completed foundational training in Generative AI for Beginners, mastering core concepts of LLMs and prompt engineering.

Technical Skills

Programming Languages: C++, C, Python

Web development: HTML , CSS, JavaScript

Tools & Developer Workflows: Git, GitHub, RESTful APIs, Asynchronous Programming, Cloud Computing Basics.

Additional Skills

- Strong teamwork, communication, and problem-solving skills
- Familiar with version control workflows (Git, GitHub), API testing (Postman), and agile/scrum development practices.
