PROFESSIONAL SUMMARY

Frontend-focused Computer Science student with hands-on experience in full-stack web development, cloud computing, and NLP-driven applications. Proven ability to build responsive, production-grade UIs and scalable REST APIs. Seeking a software engineering or frontend role to deliver impactful user experiences.

EDUCATION

Bachelor of Technology in Computer Science

Medi-Caps University • Indore, India

Aug 2023 – May 2027

EXPERIENCE

Frontend Engineer Intern | Worsingo, Bangalore

June 2025 – Sept 2025

- Deployed and maintained a fully responsive static website using HTML, CSS, JavaScript, and Serverless APIs integrated with Cloud Functions and Cloud Databases.
- Built reusable, maintainable UI modules leveraging component-based architecture, props handling, and lifecycle methods.
- Collaborated with backend engineers to design and test secure REST API endpoints, optimizing data handling and resolving integration issues.

PROJECTS

Election Sentiment AI — Python · FastAPI · Scikit-Learn · NLTK · HTML/CSS/JS

- Built an end-to-end NLP pipeline using Python and Scikit-Learn to preprocess text and classify real-time political sentiment with high accuracy.
- Architected a FastAPI REST API for asynchronous inference, ensuring low-latency model serving; optimized model via K-fold cross-validation.
- Developed an interactive frontend dashboard in JavaScript to visualize live sentiment trends and prediction metrics.

Learning Management System (LMS) — Python · FastAPI · MongoDB · React · Tailwind CSS

- Built a full-stack LMS with role-based authentication (Admin / Instructor / Student) and dynamic enrollment workflows.
- Architected an asynchronous FastAPI backend with MongoDB to manage scalable RESTful routes for courses, assignments, and real-time progress tracking.
- Designed a responsive React + Tailwind UI for tracking course analytics, grades, and content completion.

Nova AI Assistant — Python · Next.js · React · Tailwind CSS · Framer Motion · MongoDB

- Developed a modern AI assistant interface in Next.js with a fully responsive dark-mode design and fluid Framer Motion animations.
- Integrated a secure MongoDB backend for real-time user session logging and dynamic cloud data connectivity.

TECHNICAL SKILLS

Languages: C++, C, Python

Web Development: HTML5, CSS3, JavaScript, React, Next.js, Tailwind CSS, Framer Motion

Backend & APIs: FastAPI, RESTful APIs, Asynchronous Programming, MongoDB, Serverless Functions

Cloud & DevOps: Google Cloud Platform, Cloud Functions, Cloud Databases, Cloud Computing

Tools & Workflows: Git, GitHub, Postman, Agile / Scrum

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Student Chapter Training (MSIT) – Responsive UI development with Tailwind CSS for designer-grade web applications.
- Python Programming Certificate – Advanced core programming via Google Developers Group (GDG) on Campus – VIT AP.
- Google Cloud & Gemini Certified (Simplilearn) – Skill badges for Gemini for Google Workspace and cloud productivity tools.
- Cloud Computing Project Certification (Simplilearn) – Industry-standard cloud infrastructure deployment.
- Generative AI Foundation Certificate (Simplilearn) – Core concepts of LLMs and prompt engineering.
