Objective

Frontend-focused Computer Science student with creative thinking for web development , software engineering , cloud computing. With experience in cloud computing , web development projects application. .Looking to bring fresh ideas to a forward thinking team.

Education

Medicaps University

Bachelors of Technology in Computer Science
Indore, India

Aug 2023 - May 2027

Experience

Frontend Engineer Intern — Worsingo, Bangalore

June 2025 – Sept 2025

- Deployed a responsive website to host a static website.
- Utilised **HTML , CSS , JavaScript , Cloud Functions , Serverless APIs , Cloud Databases**.
- Worked with **component-based architecture**, props handling, and lifecycle methods to build reusable and maintainable UI modules.
- Collaborated with backend teams to design and test **secure API endpoints**, optimised data handling, and troubleshoot integration issues.

Projects

Created a VM on Azure and Hosting a Static Website

Jul 2025 – Aug 2025

Language: HTML , CSS

- Created a Visual Machine on Azure and using HTML , CSS create a static website and Host the Website on the server.
- Implemented basic Azure networking , firewall rules and VM management.
- Demonstrated understanding of cloud services , deployment and infrastructure management.

Serverless Personal To-Do List Application

Sep 2025 - Oct 2025

Tech Stack: CRUD operations, Serverless APIs , Cloud Database , Cloud Functions , HTML , CSS

- Developed a serverless web application for managing personal tasks.
- Implemented CRUD functionality for tasks using cloud based backend services.
- Integrated frontend with serverless APIs , eliminating the need for server management.

- Improved scalability and cost efficiency through event-driven architecture.

Created User Login System using AWS Cognito and LAMP Stack

Nov 2025 - Dec 2025

Tech Stack : DynamoDB , API Gateway , AWS Lambda , Serverless Architecture

- Designed and deployed a serverless to-do list application using AWS Cognito for authentication and authorization.
- Developed AWS Lambda functions to handle CRUD operations on tasks.
- Integrated frontend with secured APIs to ensure access control for logged-in users only.
- Leveraged serverless architecture for automatic scaling, high availability and cost efficiency.

Sharexpress - Privacy-First Distributed File Sharing Platform / Open Source Jan 2026 – Present

Tech Stack: FastAPI, PostgreSQL, SQLAlchemy, Redis, AWS (S3, EC2, CloudFront), WebSockets, JWT, Docker, Kubernetes, GitHub Actions, pytest

- Engineered scalable distributed backend system with 30+ REST endpoints following microservices architecture, event-driven design, and Domain-Driven Design (DDD) principles; implemented RBAC, distributed caching with Redis, and asynchronous task processing reducing database load by 35% and supporting 1000+ concurrent users.
- Developed real-time bidirectional communication using WebSockets and asynchronous I/O for live file transfer status; integrated AWS S3 for distributed object storage with client-side encryption, multipart uploads, and CDN (CloudFront) achieving 99.99% availability and <100ms latency globally.
- Containerized application using Docker Compose for development and Kubernetes for production orchestration; established comprehensive CI/CD pipeline with GitHub Actions including automated testing (85%+ coverage), static code analysis (SonarQube), security scanning, and zero-downtime blue-green deployment to AWS EC2.

Achievements

-
- Completed Microsoft Student Chapter – MSIT
(Tailwind CSS : Style Apps like Design Guru).
 - Google Developers Group on Campus – VIT AP
(Python programming course : Zero to Expert)
 - Google Cloud | Simplilearn Skill Up
Declaration of Completion – Gemini for Google Workspace
 - Certificate for projects completion (Cloud Computing)
 - Simplilearn Skill Up
Certificate of Completion – Generative AI for Beginners

Technical Skills

Programming Languages: C++, C, Python

Web development: HTML , CSS JavaScript

Cloud: AWS (EC2, IAM, Lambda, S3, API Gateway), Google-Cloud (basic)

Additional Skills

- Strong teamwork, communication, and problem-solving skills
- Familiar with version control workflows (Git, GitHub), API testing (Postman), and agile/scrum development practices.
